

HISTORY

Baptist Hill is a public high school that serves students in grades seven through twelve. Prior to 1948, Baptist Hill was a small, rural elementary school. Students who desired a high school education had to travel to Charleston to attend Burke High School or Avery Institute.

The original high school was constructed in 1948 and additions were made in 1952, 1954, 1967, and 1971. The gymnasium was renovated in 1996, a new cafeteria was built in 2000, and renovations in 2003 included a new science wing. Baptist Hill students now enjoy a newly renovated, attractive campus. Students will graduate with the knowledge and skills to compete successfully in any post-secondary program in the nation.

In 2009, our school underwent a transformation from a 9 – 12 school to a 7 – 12 school. We welcome the challenge of producing bright and motivated middle grades students.

Since its opening in 1948, Baptist Hill Junior/Senior High School has graduated thousands of students who are engaged in various fields of endeavor throughout the state and nation. We are constantly striving to help each student develop to his/her highest potential and together, as a team, to make our school the very best.
